			Abdominal pain
Patients with abdominal pain, who are haemodynamically st		, 	
IV Medication Rehydration		Package of care Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
GP/NP/CP Follow-up Consult	\$158.00	Package of care	Calified be claimed with any other invoice on the same day. Includes consult time and any consumables
RN Follow-up consult	\$39.00	One only	Follow up consultation for management post ultrasound result
Abdominal Ultrasound to support management and avoid ac		on	
Can no longer claim practice obs, extended consult or home	ne visit		
			Asthma
Patients with moderate asthma exacerbation that can be safe		· · · · · · · · · · · · · · · · · · ·	
Practice observations		Maximum 2 hours	Practice observations can only be claimed at the time of the initial consult
GP/NP/CP Follow-up Consult RN Follow-up consult	\$79.00 \$39.00	One only	Limited to one per episode of care within 3 days of the initial consult
Can no longer claim extended consult or home visit	\$39.00		
			Cellulitis
Adult >= 15 years with moderate cellulitis that can be safely	managed in	the community	
IV Cellulitis	\$87.00	Three only *	* extra IV antibiotic doses can be claimed if approved by secondary care - this must be documented
Oral Cellulitis (In person)	\$79.00	Three only *	
Can now claim oral antibiotics as well			
Adult > 15 years with moderate collulitie (ACC funded) that	t can be cafely	y managed in the community	Cellulitis (ACC)
Adult >= 15 years with moderate cellulitis (ACC funded) that ACC - IV Cellulitis		Two only	Cannot be claimed for the first dose of IV antibiotics
ACC - Oral Cellulitis (In person)		Two only	Cannot be claimed for the first dose of ry antibiotics Cannot be claimed for the first dose of oral antibiotics
Can now claim oral antibiotics as well	755.00	, we can	
			Acute ECG
The diagnosis is unclear, but the patient would otherwise be	e sent acutely	to hospital for ECG. This funding d	
ECG	\$63.00	Package of care	Includes consult time and any consumables
GP/NP/CP Follow-up Consult	\$79.00		
RN Follow-up consult	\$39.00	One only	Follow up consultation for management post ECG
Price increase for ECG Can no longer claim extended consul	lt		This funding does not cover the cost of a routine ECG
			CORD
Patients with an acute or sub-coute CORD average factor of	can be sel-	y managed in the secretive?	COPD
Patients with an acute or sub-acute COPD exacerbation that GP/NP/CP Extended consult	\$79.00	y managed in the community Maximum 2	At the time of acute presentation to a maximum of 30 minutes
GP/NP/CP Extended consult GP/NP/CP Follow-up Consult	\$79.00	ινιαλιιτιμιτι Δ	At the time of acute presentation to a maximum of 30 minutes
RN Follow-up consult	\$39.00	One only	Follow up consultation for management post CXR result
CXR to support management and avoid acute admission	755.00		
Can no longer claim practice obs or home visit			
			DVT
			ent of a pregnant women with a clinical suspicion of DVT must be discussed immediately with relevant hospital specialist (and documented)
GP/NP/CP Follow-up Consult		One only	Follow up consultation following ultrasound
DVT Prophylactic Enoxaparin	\$79.00		Administration of enoxaparin where oral treatment is unsuitable
Ultrasound Can no longer claim extended consult, follow up options co	oncolidated		
can no longer claim extended consuit, lonow up options co	unsundated		DVT (ACC)
ACC valated: Compart of DVT of the AACH C	positive D-dir	mer : Superficial venous thrombosis	: Management of a pregnant women with a clinical suspicion of DVT must be discussed immediately with relevant hospital specialist (and documented)
TACC related: Suspected DVT with a Wells Score of >= 2 or a p

GP/NP/CP extended consultation

To cover an additional 15 minutes of GP/NP/CP time above the initial 15-minute consultation. This invoice can be claimed twice per episode of care to fund a maximum of 30 minutes of additional time. This invoice can only be claimed at the time of the initial consultation.

GP/NP/CP follow up

RN follow up A follow-up visit may be funded (based on treatment provided as evidenced in clinical notes). This is limited to one consultations can be virtual, to be eligible for funding, documentation needs to include a two-way conversation between the

practice and the patient. A sent message with no documented response does not meet the definition of a consultation.

Urgent diagnostics can be accessed and co-ordinated by general practice or urgent care clinics without contacting the Primary Options team. Bookings can be made by the practice or the patient.

Patients can arrange their own radiological investigation provided they have the required documentation with them, which includes the referral from the practice and the primary options claim number. This is dependent on the investigation being one of those listed above. Any investigations not listed will not be funded, irrespective of whether the practice has provided the patient with a claim number.

Patients who are not acutely unwell and do not require a same day diagnostic test are not funded under POAC and should be referred to primary referred radiology. Radiology is only funded for same-day investigations, with the exception of ultrasounds through the DVT pathway which can be the next day with enoxaparin coverage.

GP provided point of care ultrasound is excluded from POAC services – it is expected that patients will be charged for this service.
